

This year America's graduation gift is health care for Moms, Dads AND Grads.

Until now, college graduation has meant gaining a diploma but losing your health insurance. One third of college students are uninsured during their first year after graduation.

But not any more!

Starting on September 26, 2010, **the new health reform law requires insurance companies to provide the option of keeping young people covered until age 26.**

That means a brighter future for many of the 13.2 million young people between the ages of 19 and 29 who are uninsured and less worry for their parents!

CALL YOUR MEMBER OF CONGRESS

Thank your US Representative for standing up to big insurance companies so that America's youth have a better chance for affordable health care!

Toll-Free Congressional Switchboard:

1-877-264-HCAN
